

Tommy's Tournament

Golf Fore Achromatopsia

7:30a Saturday, October 21st, 2023

Los Lagos Golf Course

Tommy is 16 years old and has a rare genetic visual disorder called achromatopsia. What I do *know* is that achromatopsia will affect his vision in a number of different ways. His most critically associated disabilities are poor visual acuity (20/200) and extreme light sensitivity (hemeralopia). Achromatopsia also means Tommy's world will be seen *only* in shades of gray. His absolute colorblindness is the result of an absence of functioning cones (cells in the eye that provide acuity and color vision).

While Tommy is the true sentinel of his disability and is the only one who truly *knows* its effects, as his father, I am compelled to help him mature into a strong and competent individual throughout what will surely be a challenging yet unique life's journey. Thank you for generosity, time, and commitment by standing with Tommy as we raise awareness and money towards finding a cure. "Like" us at <https://www.facebook.com/TommysTournament>.

Registration:

- Tournament Registration Fee: \$180.
- Please submit payment using the below options **by 9/16/23**
